UCSF

University of California, San Francisco
. . . A Health Sciences Campus

JANUARY—FEBRUARY, 1984

TO OUR NEIGHBORS

March & April, 1984, Vol. IX, No. 2

Join Us on Founders Day Saturday, March 24

The neighborhood is invited to join UCSF in celebrating its Third Annual Founders Day on Saturday, March 24, when the campus proudly acknowledges research in the dental, medical, nursing, pharmaceutical, basic biomedical and behavioral sciences.

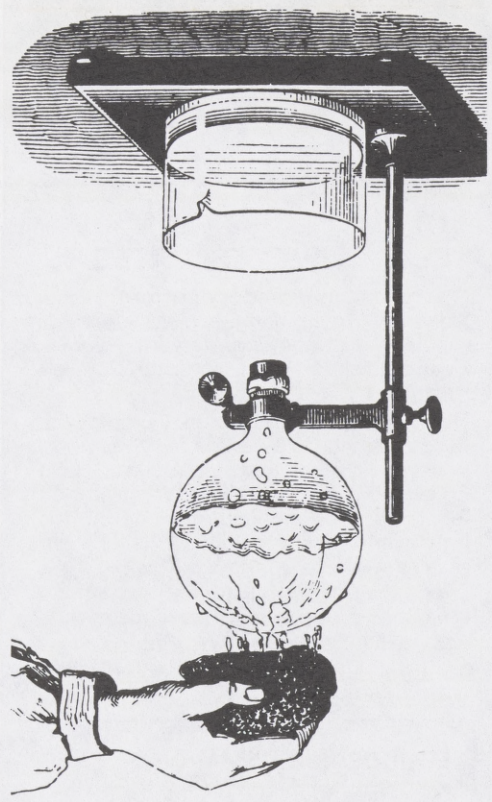
The day's events, which will reflect the theme "Research in Service to Humanity," will begin at 10 a.m. with morning tours of selected UCSF research areas including the Cancer Research Institute, the Human Interaction Laboratory and the Computer Graphics Laboratory, and of the new Long Hospital. Tours will depart every hour on the hour from the Visitors/Information Center, lobby of the Medical Sciences building, 513 Parnassus Ave.

Open houses will be held at the UCSF Library, 513 Parnassus Avenue, second floor, with tours of the general and historical collections from 10 a.m. to 3 p.m., and at the Faculty/Alumni House, 745 Parnassus Avenue, featuring the audiovisual presentations: "UCSF Now" and "UCSF: The Year in News," from 11 a.m. to 3 p.m.

The schools of Pharmacy, Dentistry and Nursing will hold alumni breakfasts, and the School of Medicine will give a morning scientific presentation from 10 to 11 a.m. in Room HSW 302 to which everyone is invited.

A portrait of the late Willard C. Fleming, former UCSF chancellor and former dean of the School of Dentistry, will be unveiled in the Medical Sciences lobby at 11:45 a.m., followed by a picnic lunch in the Millberry Union gym. For lunch tickets at $7 each call 666-2401.

The Founders Day Lecture will be held in Cole Hall from 1:30 to 2:30 p.m.: "Advancement of Knowledge: The Cornerstone of a University," by UC President David P. Gardner, and "UCSF's Distinction in Research—What It Means to People," by Chancellor Julius R. Krevans.



Public Hearing Held

A public hearing was held on Thursday evening, February 16, to receive testimony on the Draft Environmental Impact Report for the proposed UCSF Vision Research Center. As is the procedure, UCSF asked for verbal and written testimony regarding the DEIR.

Steven Kramer, MD, chair of the Department of Ophthalmology spoke on the need for a vision facility at UCSF, and two members of the community voiced their concerns about certain aspects of the project and the DEIR.

Individuals have until 5 p.m. on Monday, March 12, to submit any further written testimony, at which time the campus will respond to all written and verbal testimony and incorporate this into a final EIR. Copies will be made available to the public. Write the Chancellor's Office, 145 Irving Street, University of California, SF, CA 94143, or call 666-2911.

Arthritis Treatments Discussed at Health Talk

The most up-to-date treatments for arthritis will be discussed at one of the free Community Health Education Lectures to be held this spring. Sponsored by the Office of Public Service Programs and the Committee for Arts and Lectures, the talks will be held on Wednesdays at 7:30 p.m. in Toland Hall, 533 Parnassus Avenue:

- March 14: "Arthritis—The Problems and Treatments." David B. Hellmann, MD, assistant clinical professor of medicine, will discuss drug and non-drug treatments for several types of arthritis.
- April 11: "The Impact of Alzheimer's Disease on Family and Society." Ida M. Martinson, PhD, professor and chair of the Department of Family Health Care Nursing, School of Nursing, will discuss the impact of Alzheimer's on the individual and family members and the challenge that this disease presents to health care professionals.

New Teleradiology Offers Speedy Diagnosis

A rapid computerized medical image storage and transmission system that speeds patient diagnosis and improves diagnostic information has been installed at UCSF's Moffitt/Long Hospitals.

UCSF is the first medical center in the country to use the digital teleradiology technology in an intrahospital, clinical environment.

The system stores on digital disks, film images obtained from conventional x-ray, computed tomography (CT), digital subtraction angiography, ultrasound and magnetic resonance. After the x-ray film is processed, the system converts the x-ray into digital signals and reconstructs the image on a screen.

The scanning and digitizing of the x-ray takes 0.75 seconds, and the images are ready for immediate display on monitors located in the Intensive Care Unit and the Emergency Room. Another pair of monitors will be installed soon in the Intensive Care Nursery.

Four New Community Leaders to UCSF Board

Chancellor Julius R. Krevans, MD, has named four new members to the UCSF Board of Overseers, and real estate broker and consultant Walter H. Sullivan, Jr., has agreed to serve as the new chair. The four new members to replace emeriti members William K. Coblentz, emeritus chair, Stuart Davis, Charles J. Patterson, and J. Gary Shansby are:

- Eugene L. Friend of San Francisco, president of Howard Properties, who is a director of the Koret Foundation and president of the SF Recreation and Parks Commission.
- Margaret L. Lesher of Orinda, director of community services and first vice president of corporate affairs of Lesher Communications, Inc., who serves as a regent of Holy Names College and director of the Mount Diablo Hospital Foundation.
- Alexander R. Mehran of San Ramon, chief executive officer of the Sunset Development Company, who is a trustee of the SF Fine Arts Museums and the Episcopal Diocese of Northern California, and a director of the San Ramon Community Center and The Hamlin School.
- Charles H. Townes, PhD, of Berkeley, professor of physics at UC-Berkeley. Recipient of the Nobel Prize in 1964, he serves as a director of the General Motors Corporation and is a trustee of the California Institute of Technology and the Carnegie Institution.

Formed in 1980, the UCSF Board of Overseers consists of 21 business and community leaders whose role is to advise the chancellor, deans and campus leaders on issues of concern to the campus.

Donation Helps Establish Lung Center

Committing itself to an attack on the growing problem of lung disease, the W.M. Keck Foundation has donated $400,000 to UCSF's new Lung Biology Research Center—the only research center in the country devoted solely to the study of lung injury and repair.

The Research Center, organized by Jay Nadel, MD, professor of physiology, and his associates, will be an integral part of UCSF's renowned Cardiovascular Research Institute, which houses this country's largest lung research program.

The grant will support researchers from many disciplines as they study basic lung biology, the way in which lung injury occurs in such diseases as asbestosis, silicosis and "black lung," and how the lung repairs itself.

Be an Olympic Torch Carrier

UCSF will participate in the 1984 Olympic Torch Relay Race this summer. The torch is to be carried over 19,000 kilometers, beginning May 8 in New York and arriving for the Olympic summer games in Los Angeles on July 28.

UCSF has reserved one kilometer of the torch relay route to be run by a UCSF representative. The winner will be chosen in a drawing held on Chauncey Leake Day, Tuesday, May 22. Tickets are $1 each and will be available on campus beginning May 15. Proceeds will benefit the San Francisco Boy's Club. For ticket information call 666-4421.

Parking Permits

Permits for night, weekend and holiday parking in the Millberry Union Garage now are available to the neighborhood at $12 each. For further information call 666-2566.
